PROFESSIONAL SUMMARY

Odoo ERP Developer with **3+ years of hands-on experience** building, customizing, and migrating Odoo modules across **Community & Enterprise** editions (v14-v19). Delivered **20+ production Odoo modules** and **150+ module migrations** spanning Sales, Invoicing, Manufacturing, Inventory, CRM, and Email Marketing. Proficient in **Odoo ORM, QWeb, OWL JS**, and Python backends; experienced integrating **AI/LLM services** (OpenAI GPT, OpenRouter.ai, Ollama) directly into Odoo workflows for CRM automation and content generation. Skilled in **Odoo.sh, Cloudpepper**, and VPS deployments. Recognized as **Best Performer of the Year** at Webkul Software.

KEY TECHNOLOGIES

Odoo ERP: Module Development · Migration (v14-v19) · ORM & Domain Filters · QWeb · OWL JS · Backbone.js → OWL 2 Migration · Odoo.sh · Cloudpepper · Community & Enterprise · Odoo Webhooks · Scheduled Actions
Odoo Modules: Sales · Invoicing · Manufacturing · Inventory · CRM · Email Marketing · Purchase · Subcontracting · Kit BoM · Procurement Rules
Backend & DB: Python · Django · Django REST Framework (DRF) · PostgreSQL · ORM Query Optimization · CRON Jobs · Celery · Redis · Batch Processing
AI & Integrations: OpenAI GPT · OpenRouter.ai · Ollama (local LLM) · WhatsApp Business API · 3CX VoIP · Postmark · REST APIs · Webhooks · SpeechRecognition
DevOps & Cloud: Docker · Docker Compose · Git · Linux · Gunicorn · CI/CD · Hostinger VPS · Render · AWS EC2 · IAM · ELB · EBS · S3 · RDS · Route 53
Frontend: OWL JS · QWeb · JavaScript · Chart.js · Driver.js · React · HTML

WORK EXPERIENCE

Software Developer (Odoo & Python)

Feb 2023 – Mar 2026

Webkul Software Pvt. Ltd.

Noida, UP, India

- Awarded **Best Performer of the Year** and **Perfect Customization Badge**; mentored **3+ junior developers** and led code reviews across sprint cycles.
- Built **20+ custom Odoo modules** and migrated **150+ modules across v14-v19** (Community & Enterprise), cutting average migration turnaround by **~30%**.
- Delivered deep customizations across **Sales, Invoicing, Manufacturing, Inventory, CRM, and Email Marketing** – new backend features, extended business logic, and tailored **QWeb PDF/HTML reports** for each domain.
- Configured **subcontracting workflows, kit BoMs, reordering rules, and multi-step procurement route triggers**; automated stock valuation and replenishment to fit client operational requirements.
- Built **custom OWL 2 components, Chart.js dashboards, and Odoo widgets**; extended the **Email Marketing snippet editor** with dynamic backend content blocks; ported **v14-v16 Backbone.js** widget code to modern **OWL 2** during version upgrade cycles.
- Configured **incoming and outgoing mail servers**; batch-synchronized **10,000+ contacts** into Odoo with full deduplication and list segmentation using Python-driven **scheduled actions**.
- Integrated **OpenAI GPT, OpenRouter.ai**, and local **Ollama** into Odoo CRM and backend workflows for smart lead summaries, reply suggestions, and content automation – reducing manual effort by **~40%**.
- Connected **WhatsApp, Postmark, and 3CX VoIP** to Odoo via REST and webhooks; auto-created CRM leads from inbound VoIP calls and mapped call metadata to CRM records for a **30-agent sales team**.
- Optimized **PostgreSQL ORM queries and indexing**, improving report generation speed by **~25%** on high-volume datasets; used **Docker Compose** to spin up isolated Odoo environments across v14-v19 for rapid cross-version testing.
- Managed **Odoo.sh and Cloudpepper** production environments; provisioned **AWS EC2** instances with security groups, IAM roles, ELB, and EBS snapshot backups.

Freelance Python Developer

Apr 2026 – May 2026

WareZip

Remote

- Built and maintained backend services for a **SaaS warehouse management platform** using Django, DRF, and PostgreSQL; deployed on Hostinger VPS with Gunicorn configuration.
- Designed **REST APIs** with JWT authentication, Google OAuth 2.0, and RBAC; partnered with React frontend team to ship **5+ API-driven features**, cutting integration turnaround by **~30%** per release.
- Resolved critical production incidents in a live SaaS environment, maintaining **99%+ API uptime** throughout the engagement.

KEY ODOO & PYTHON PROJECTS

AI-Powered Odoo CRM Suite | *Odoo, Python, OpenAI GPT, OpenRouter.ai, Ollama, SpeechRecognition*

- Embedded **OpenAI GPT** and **OpenRouter.ai LLMs** into Odoo CRM for intelligent lead summaries and smart reply suggestions; integrated **Ollama** for fully offline AI inference within Odoo workflows.
- Engineered **real-time VoIP call transcription** using Python's SpeechRecognition library, auto-saving structured transcripts to CRM records and eliminating manual note-taking for sales teams.

OpenRouter Mail AI Studio | *Odoo, OpenRouter.ai, OWL JS, QWeb, Unsplash API, Python*

- Built an **AI-powered email marketing platform inside Odoo** – auto-generating full templates and subject lines from a single prompt via **OpenRouter.ai LLMs**; integrated **Unsplash REST API** for royalty-free image insertion.
- Engineered an **inline block editor** for post-generation content edits and implemented multi-layer guardrails: input sanitization, LLM response validation, and ORM-safe writes.

Canna – Email Marketing & Mailing List Sync | *Odoo, PostgreSQL, Python, JavaScript, Drupal*

- Batch-synchronized **10,000+ subscriber contacts** from Drupal into Odoo with full deduplication and list segmentation; deployed a **CRON-based email validation pipeline** to reduce bounce rates and improve deliverability.
- Extended the **dynamic snippet editor** with reusable backend email components; built campaign analytics dashboards supporting **10,000+ subscribers**.

Sahitya Bhawan – Odoo ERP Customization | *Odoo, Python, PostgreSQL, QWeb, JavaScript*

- Automated commission calculations across yearly targets and quarterly slabs for multiple sales agents using **Odoo scheduled actions and automated rules** – fully replacing a manual process.
- Built a reusable **financial year-based filter (FY 2025–2026)** deployed across **5+ QWeb reports**; configured automated **WhatsApp and email stock alerts** with product-wise reporting.

Caribbean Sign – 3CX VoIP + Odoo CRM Integration | *Odoo, Python, REST API, Webhooks*

- Unified **3CX VoIP with Odoo CRM** to auto-create and assign leads from inbound calls; mapped call metadata (duration, caller ID, timestamps) to CRM records, eliminating manual entry for a **30-agent sales team**.

Visitor Management System | *Django, DRF, PostgreSQL, JWT, RBAC, Render* | *Live*

- Production-grade Visitor Management API with DRF, JWT authentication, and multi-role RBAC; deployed to Render with full PostgreSQL and environment configuration.
